About Tricon

Tricon is one of Australia's leading suppliers of mobile crushing, screening, recycling, conveyor and associated spare parts.

Tricon's industry reputation is built on our track record of continually meeting customer expectations and demand for supply, as well as value-add services including maintenance, servicing, inspections, training, and repairs.

We understand the importance of the productivity and reliability of our products to your business. We also understand the value of minimising downtime and offer a highly responsive after-sales and spare parts service.

Our attention to the detail helps your business in its day-to-day operations, ensuring efficiency and productivity. We're also committed to building long-term relationships with our customers through customised after-sales programs.

We ensure our customers receive the right equipment, at the right price, delivered on time to meet project schedules. We pride ourselves on acting as a trusted partner who can help educate and inform our customers on new product development and training.

Tricon has a well-established and loyal customer base, having dedicated ourselves to deliver exemplary customer service, support, and satisfaction for over 20 years.

Our trained service engineers have experience with a wide range of crushing, conveyor, and screening equipment. We have access to a huge range of OEM and after-market spare parts, ensuring the longevity of your machine.

Our products and services meet, and in most instances exceed, Australian quality, safety, and environmental standards. Tricon works in alignment to AS/NZS ISO 9001-2016 and management systems comply with Commonwealth and state legislation.

Our suppliers, fabricators, and designers work safely and efficiently all using industry best practices, as well as Australian OHS & workplace safety practices.

First established in 1972, Superior was founded by the son of a sand and gravel producer. At the beginning of his career, Neil Schmidgall improved portability and production technology for his father's plants. When neighbouring aggregate producers asked if he could improve their equipment, Schmidgall took his company public.

Since then, Superior has maintained a strong entrepreneurial and enthusiastic approach to business. The manufacturer established conveyor and plant portability designs that are favored all around the world. In 2016-17 – after several acquisitions and some in-house design projects – Superior debuted a brand new group of crushing, screening and washing equipment. These products joined an existing and evolving conveyor and custom plant portfolio for a complete product offering from Rock Face to Load Out®.

In addition, Superior uses its material handling skills to design and build a dependable line of conveyor idlers, pulleys, scrapers and accessories.

LIPPMANN

Lippmann, a renowned manufacturer of heavy-duty crushing equipment, has a rich history dating back to 1923 when it was founded by Samuel Lippmann in Milwaukee, Wisconsin.

The company initially focused on manufacturing mining and aggregate processing equipment, establishing itself as a reliable player in the industry. Over the decades, Lippmann earned a reputation for designing robust and innovative solutions, catering to the evolving needs of the construction and mining sectors.

Lippmann's commitment to quality and durability has been a constant throughout its history, contributing to its longevity and success in the market. The company has continually adapted to advancements in technology, consistently delivering cutting-edge crushing and screening equipment. With a legacy spanning nearly a century, Lippmann remains a trusted name in the industry, providing reliable and efficient solutions for crushing applications worldwide.
